

QUALITY & ENVIRONMENTAL POLICY

As Kale, designing and producing product&process connection technologies; our goal is to advance in every aspect, for successful global competition to assure our existence.

Therefore we focus on the continuous improvement in quality, time & cost, by:

- the prevention mentality
- the focus on standards
- the focus on customers and shareholders
- the process management with knowledge, experience and risk approach
- the focus on processes
- the focus on life cycle
- the reduction of waste &
- the participative employees

In respect to the environment, we focus on:

- Abiding legislation & other requirements within our scope
- Reducing waste to prevent pollution & to improve environmental performance
- Increasing awareness of our employees on our policy
- Reducing resource consumption

We undertake to realise this policy, by:

- publishing this policy
- defining clear goals & priorities
- providing necessary funds
- reviewing the efficiency & effectiveness of our management systems.
